

The background is a composite image featuring a blurred office scene with a laptop and a hand typing. Overlaid on this are various data visualization elements: a bar chart on the left, a world map with percentage callouts (35%, 19%, 7%, 24%, 8%, 26%, 20%) in the bottom left, and a line graph with a glowing point in the bottom right. A large blue and green geometric shape is on the left side.

Building Successful IT Career

- By Mr. Nataraz & Team

Overview

- Onboarding process in Company
- Project allocation
- Dos & Don'ts - Initial days in IT
- Planning a strong IT career
- Things that can massively damage your IT career
- Value of process in industry
- How to build massively successful career,
- Belonging in top 20% of IT

market

Initial days of industry

Do's & Don'ts

- **Mix with team members**
- **Abiding with team process**
- **If there is any confusion, then ask questions. Getting clarity in understanding**
- **Managing code / environments with care.**
- **If stuck anywhere, get help from google. In later stages from team members.**
- **Put extra efforts than your team members**
- **Share knowledge and help others.**

- **No carelessness with system. Act professional**
- **No “Sir” culture. Refer people by names.**
- **Don't use office machines for personal work.**
- **Don't hide things. Keep it transparent**
- **No unplanned leaves**
- **Don't work on wrong assumptions.**
- **Work on professional communication.**

Get ready for
STRONG IT CAREER

Planning a strong IT career

Initial years:	0-3 years
Second level:	4-6 years
Next:	6+ years

Tip

Initial years full commitment. And hardwork.

Strategize and plan your career. Don't leave on time.

Things that can massively damage your IT career

- Relaxing in initial years.
- Not upgrading skill set.
- Limited exposure of things.
- Not chasing knowledge for money.
- Complaining mentality.
- Wrong attitude.

A graphic of a staircase with a green step and a blue step, and a piece of grey tape.

Tip

Be SMART, right from beginning.
